## Coding Standards
### File Structure
    a. All header files must be followed by their corresponding implementation files (e.g. File.h and File.cpp)
        i. The only exception is main.cpp

### Naming Conventions
    a. The name of the function must describe the reason for using the function clearly and briefly.
    b. All variables should be named using snake case if the variable name contains more than one word (e.g. name_var)
    c. All functions should be written in camel case (e.g. someFunc())
        i. The only exception are the option functions found in Menu.cpp (e.g. Option1())
    d. The name of all files should start with a capital letter (e.g. Menu.cpp)
        i. The only exception is main.cpp

## Contribution Guidelines
### Code Contribution
    a. Code contribution can be made via pull requests
        i. When making pull requests, please elaborate on what changes/additions have been made
        ii. Please wait patiently for the pull request to be approved
    b. Make sure that code contribution follows the coding standards
    c. Add comments to code to signify the changes/additions

### Set up and test
    a. When pull requests are made, tests will be run prior to waiting for approval
